CXO
COAXIAL DRIVE

Le cinematiche del carro consentono una variazione minima dell'angolo della sospensione posteriore garantendone così la massima efficienza.

The rear axle kinematics allow minimal variation of the rear suspension angle, thus ensuring maximum efficiency.

La cinemática del tren trasero permite una variación mínima del ángulo de la suspensión trasera, garantizando así la máxima eficiencia.

ULTRA
LICHT

Il massimo della tecnologia monoscocca applicata alla fibra di carbonio per garantire la massima leggerezza e prestazione.

State-of-the-art monocoque technology applied to carbon fiber to ensure maximum lightness and performance.

La más avanzada tecnología monocasco aplicada a la fibra de carbono para garantizar la máxima ligereza y rendimiento.

INTEGRATED
CHAIN STAY

Il carro posteriore basso è integrato all'interno del tubo sella ed ospita lo snodo principale rinforzato con doppi cuscinetti."

The lower chain stay is integrated into the seat tube and houses the main pivot, reinforced with double bearings.

El triángulo trasero inferior está integrado en el tubo del sillín y alberga el eje principal, reforzado con rodamientos dobles.

1893

Cicli Olympia prosegue di slancio il suo percorso imprenditoriale, sempre all'insegna dell'innovazione nelle tecniche costruttive e nel design della bicicletta. Olympia nasce nel 1893 a Milano, fondata da Carlo Borghi. All'inizio la sua produzione riguarda anche i motocicli, peraltro molto apprezzati, ma è al ciclismo che Borghi dedica passione ed energie. Con le maglie Olympia, bianche con fascia nera, Enrico Mollo arriva secondo al Giro d'Italia del 1940 e Pietro Chiappini vince una Milano-Torino l'anno dopo. Nel 1960 il brand passa nelle mani della famiglia Fontana, che trasferisce la produzione in Veneto. La Olympia degli anni 2000 opera nel nuovo stabilimento di 4400 mq a Piove di Sacco (Padova). Oggi Olympia è un brand conosciuto e apprezzato in campo internazionale. Negli ultimi anni ha conosciuto un grande impulso la produzione di biciclette a pedalata assistita. In campo agonistico Olympia significa soprattutto off road. Da alcuni anni le mtb prodotte a Piove di Sacco accompagnano nei loro successi gli azzurri del Centro Sportivo Carabinieri e in particolare Daniele Braidot e Filippo Fontana, rappresentanti di vertice della nazionale italiana.

Olympia continues always aiming at innovation in construction techniques and bicycle design. Olympia was born in 1983 in Milan, founded by Carlo Borghi. In the early days, also motorbikes were a much acclaimed part of the business; but Borghi's passion and energy were mostly dedicated to cycling. Wearing the Olympia shirts, white with a black stripe, Enrico Mollo reached second place in the Giro d'Italia (1940) and Pietro Chiappini won the Milan-Turin race (1941). In 1960, the brand passes into the hands of the Fontana family, who transfers production to the Veneto region. Nowadays, in the new Millennium, Olympia operates in the ultra-modern facilities of 4400 m2 in Piove di Sacco (Padua). Today, Olympia is a renowned and appreciated brand internationally. In recent years, the production of pedal-assist bikes has skyrocketed. Olympia means above all off-road racing. For years, the MTBs manufactured in Piove di Sacco have helped national team athletes of Centro Sportivo Carabinieri ride to stunning victories; this is particularly true for Daniele Braidot and Filippo Fontana, the Italian off-road top performers.

Cicli Olympia continúa su camino empresarial con ímpetu, centrándose siempre en la innovación de las técnicas de fabricación y del diseño de la bicicleta. Olympia nace en 1893 en Milán, fundada por Carlo Borghi. Al principio también fabricaba motocicletas, que entre otras cosas eran muy apreciadas, pero es al ciclismo que Borghi dedica pasión y energía. Con el maillot Olympia, blanco con franja negra, Enrico Mollo llega segundo en el Giro d'Italia de 1940 y Pietro Chiappini gana una Milán-Turín el año siguiente. En 1960, la marca pasa a manos de la familia Fontana, que traslada la producción a la región Véneto. La Olympia de los años 2000 opera en la nueva planta de 4400 metros cuadrados en Piove di Sacco (Padua). Hoy Olympia es una marca conocida y apreciada internacionalmente. En los últimos años, la producción de bicicletas con pedaleo asistido ha experimentado un gran impulso. En campo competitivo, Olympia significa sobre todo off road. Desde hace algunos años, las mtb fabricadas en Piove di Sacco acompañan a los éxitos de los «azzurri» del Centro Sportivo Carabinieri, y en particular a Daniele Braidot y Filippo Fontana, importantes representantes de la selección italiana.
